Dispensing Trolleys Options

Security Clamp

Features
- Allows the trolley to be secured to the ‘fabric of the building’
- Suitable for UD and MT trolleys
- Requires no additional keys, utilises the trolleys own locking system
- One end is secured to the wall, the “hook shaped” end is trapped by the door/lid of the trolley when closed and locked
- Recommended wall fitting height approx 1000mm

Important Note - Security Clamps

It is a requirement that when the trolley is not in use it should be secured to the “fabric of the building”. Not only does this prevent casual theft, i.e. trolleys being pushed to an isolated area and broken into, but also encourages good nursing practice, giving the trolley a “permanent home”.

SA005 - Shown with optional SA905
Dimensions & Weight

- Dimensions are stated in millimetres (width x depth x height)
- Weights are stated in kilograms
- Please ensure you are aware of the item size and weight prior to ordering

Castors

- All castors are fitted with non-marking tyres (with the exception of some anti-static versions)
- Anti-static castors can be identified by a yellow thread guard or a yellow mark on the edge of the tyre
- Castors are selected to suit the anticipated use of the trolley/piece of equipment
- Castors and wheel bearings do not require specific maintenance other than regular cleaning. The use of oil will breakdown the grease applied to the bearings, reducing the life of the castor. We recommend that fittings are checked regularly and re-tightened as required
- Where anti-static castors are fitted, we recommend that the tyre is periodically cleaned to remove any dirt to ensure a good contact between the tyre and the floor

Locks & Keys

- Locks should operate smoothly. If they do not, please arrange urgent attention and where necessary obtain a replacement
- Locks require only minimal maintenance and should only be lubricated using a dry lubricant such as graphite which can be purchased from most locksmiths (NEVER USE OIL)
- When ordering replacement locks or keys, please ensure that the product code, and any letters/numbers from the key and lock are available

Paint

- We only use lead-free epoxy/polyester powder paint
- Where possible colours are applied in special booths to allow for overspray to be recycled
- Alternative colours are available, this may be incur a small surcharge

Stainless Steel

- We use 304 and 430 grade stainless steel
- Grade 304 is non-magnetic and used on products which are not painted
- Grade 430 is magnetic and used on painted products
- Other grades are available on request, i.e. 316
- Please note that the term 'stainless' is not entirely accurate, as certain chemicals can 'eat' into the surface. In particular 'iodine' which can badly corrode/stain and as a result should not be used as a cleaning agent

Laminate & Wood Products

- Wood products are manufactured from FSC accredited materials
  - High pressure laminate bonded to MDF
  - Melamine faced MDF
- Edges are protected with 2mm ABS/T-Barb edging or sealed with varnish
- Both laminate and melamine panels offer some resistance to water penetration under normal usage
- We only use water based adhesives and varnishes

Upholstery

- Upholstered panels are manufactured from ‘Flame Retardant’ materials, independently tested to ‘BS5852 Ignition Source 5’ (BS7176 Medium Hazard)
- Vinyl's offer resistance to:
  - Melsept SF - Code CH - B:4422M32 (0.5% / 5%)
  - Hexaquart S - Code CH - B:406432 (1.5% / 5%)
  - Meliseptol - Code CH - B:4273M92 (Undiluted)
- All foam is ‘Fire Retardant’ and free of ‘Hexa-Bromo-Cyclo-Dodecane’

Latex

- All products are latex free
The maintenance of high standards of cleanliness on all surfaces and equipment is a crucial factor in the prevention and control of infection. Whilst dust, dirt and moisture can harbour infection, the key risks are associated with contamination arising from contact with blood, body fluids, mucous membranes and damaged skin. In all cases surfaces must be thoroughly cleaned and disinfected in order to destroy pathogenic microorganisms.

Bristol Maid™ products have been designed for use in demanding environments; full cleaning instructions can be downloaded from www.bristolmaid.com

Hospital Metalcraft meets its obligations as a business to business producer of Electrical and Electronic Equipment (EEE) through:

- Membership of the Veolia Environmental Services WEEE, (Waste Electrical and Electronic Equipment), Producer Compliance Scheme (Registration No. WEE/KE0677RX)
- Marking EEE placed on the market by Hospital Metalcraft with the mandatory crossed out wheeled bin symbol and Bristol Maid logo
- Making information available, (for EEE placed on the market after April 2007), to assist those engaged in treatment, recovery and recycling activities
- Arranging for the collection, treatment, recovery and environmentally sound disposal of obligated WEEE

Customers are advised that infected medical devices are not included within the scope of the WEEE Regulations and that arrangements described above do not extend to such products

How To Order

- All orders are required in writing, either by fax, email or post. Unfortunately we cannot accept orders over the phone.
- Orders should be submitted as an ‘official purchase order’ on company headed paper. All information should be clearly displayed.
- Your order should contain the following - invoice address, delivery address, full contact details (name, phone & fax number) and item codes along with descriptions and prices.
- If applicable, please ensure our quote number is detailed on your order to ensure any agreed discounts are applied.
- Item codes and descriptions in this catalogue supersede all previous editions.
- A full price list can be requested from our website.
- Payments can be made by cheque, bank transfer or credit/debit card (with the exception of American Express).
- If you are a new customer, the first three orders will be processed on a proforma basis, paid in full prior to manufacture & delivery, after which a credit account may be applied for.
- For our terms and conditions refer to www.bristolmaid.com.
- For further information and assistance, please contact our customer services team on +44 (0) 1258 484455.

Tenders & Contracts

Bristol Maid™ has wide ranging experience in the facilitation and project management of tenders and contracts. Through many years’ experience we are uniquely placed to support our customers in the selection, delivery, installation and commissioning of both large and small projects.

To discuss your tender or contract requirements please contact our Customer Services Team.

- Site audit and equipment recommendations
- Full project management
- Scheduled deliveries
- Product placement and removal of packaging
- Installation and commissioning
- Training

Preventative Maintenance, Spares & Service Support

Bristol Maid™ products are designed and manufactured to meet the demands of everyday use, with the majority of our products under normal conditions providing many years of trouble free service.

Where annual maintenance or periodic inspections are required, we are able to offer comprehensive planned preventative maintenance through a scheduled service contract or call out by our own trained Engineers. For your peace of mind and continued product reliability, please contact our customer service team for details on the following services.

- Preventative maintenance contracts & packages
- Supply of spare parts
- Site audit and equipment recommendations

Custom Design & Manufacture

If you have been unable to find a product that exactly meets your requirements, then please contact us so we can work together to develop a solution that will exactly match your needs. Our design capability allows us to provide everything from minor product specification changes through to a full design & development service.
