- Compatible with battery powered RFID controlled electronic locks
- Credit card size plastic key cards with an embedded contactless RFID chip
- Available as user/staff/master access cards
- A programming card is required for each hospital or ward as per hospital procedure

Overall Dimensions (w x d x h)

- Card - 86 x 54 x 2mm

What was Design Bugs Out?

A UK Department of Health initiative in conjunction with the NHS Purchasing & Supply Agency and the Design Council which challenged UK’s top manufacturers and designers to help control the risk of Healthcare Associated Infections by making hospital furniture and equipment easier and quicker to clean, concentrating particularly on products positioned by, or used in the vicinity of the hospital bed.

Bristol Maid™ took up this challenge with Kinneir Dufort to redesign the traditional Bedside Cabinet. Existing cabinets typically have complex internal spaces, hard to reach surfaces and angular joints, in short, areas which can harbour liquids, dirt and more importantly bacteria. Most designs are also constructed from wood/ laminate or other similar materials which cannot be steam cleaned.

The Solution

A multiple award winning bedside cabinet constructed from recyclable polyethylene, featuring an open / backless body with fully removable drawers. The cabinet features a seamless design which can be easily and effectively cleaned. It provides separate areas for patient and staff to use, drawers which can be secured with RFID controlled electronic locks and the flexibility to configure for use on either side of the bed.

eClean™

Commenting on the cabinet, Diane Simpson, Senior Matron for infection prevention and control at Chesterfield Royal Hospital, said ‘This locker has been specifically designed to help us keep the patient area clean. Because the unit has no back, and we can take out the drawers completely, it can be wiped clean in minutes and ready to receive the next patient. A lot of the work we do in promoting good hygiene among our staff is centred on the patient environment and this unit is a part of that. By making things easier to clean we are reducing the risk of seeing potentially harmful bacteria travelling from patient to patient’.

The Range

eClean™ now consists of a range of ward based products designed to reduce the risk of infection through effective design.

RFID Electronic Lock

- Battery powered electronic identification & locking system using transponder technology compatible with our BL range
- Replaces traditional locks and keys
- Offers in excess of 4.3 billion key differs providing very high security
- Whenever the lock is accessed, a transaction is created. This provides information detailing the user/date and time (once the maximum number of transactions has been reached, the oldest transaction is overwritten)

Benefits

- Keys are maintenance free, light to carry & cannot be used as a weapon
- Various key styles are available to suit different environments, ie cards, fobs and straps
- One key for many applications
- Access authorisation can be changed immediately helping to eliminate fraudulent operations (exchange of the lock cylinder is not necessary)
- Keys can be reprogrammed as staff change

Applications

- Administration of Drugs & Medicines (Patient Own Medicine/Self-Administration schemes)
- Subject to the lock being fitted within other areas of the department/building, Dialock can be used to control access to buildings & individual rooms, storage areas etc. and programmed to match the user’s authorisation within the organisation including time and date specifics, with an end date if required

Please contact our Sales Team for more information

Bedside Furniture & Equipment

Polymer Overbed Table - Easy Clean

Features

- Cantilever design (suitable for use with beds and chairs)
- Tubular C shaped base and extruded aluminium column
- Recyclable polyethylene column shroud and table top
- Raised lip on table reduces misplacement of objects and contains spillages
- Defined surface edges and contours ensure that all key surfaces are accessible
- Height adjustable using a gas damper (710-1025mm)
- Safety feature prevents the trapping of a patient between the bed and table
- 50mm twin wheel castors
- Maximum load 20kg

Overall Dimensions (w x d x h)

- 965 x 450 x 710 -1025mm

Standard Colours

- Base/Body - Grey White
- Upright - Spearmint

The Facts

It is estimated that 5,000 people in the UK die each year from infections such as MRSA, costing the NHS £1 billion a year. The immediate area around a patient’s bed has been identified as a key area in fighting infections. Existing bedside furniture and fixtures are often hard to clean due to their shape, materials and surface finish.
