Drug & Medicine Cabinets - Single Door

Features

- Independently tested to BS2881: 1989 (Security Level One) Specification for Cupboards for the Storage of Medicines in Health Care Premises
- BS3621 anti pick and drill, key retaining five pin cylinder lock (supplied with 3 keys)
- Available with...
  - Adjustable & removable standard shelves (190mm deep) & door shelves (75mm deep)
  - Adjustable & removable deep shelves (250mm deep)
- Key profile unique to Hospital Metalcraft Ltd, offering 250,000 differs per profile
- Compatible with ABLOY® CLIQ™ Remote, integrating electronics into high security mechanical disc cylinders & keys, combining electronic security and remote management in real time
- 12v DC LED lighting/warning system (model dependent) with volt-free contact to allow connection to light/nurse call systems, CE marked & conforms to the low voltage directives 73/23/EEC & 89/336/EC
- Lighting transformer casing adds 105mm to overall height (model dependent)
- 0.9mm mild steel welded construction
- Mounting holes provided in back (fixings not included)
- Modular design allows for easy interchange with HTM 63 storage systems
- Compatible with our range of CD cabinets for the storage of Controlled Drugs (see tables)

Auditable Access Control for Medicines Management

What Is Cliq™ Remote?
ABLOY® CLIQ™ REMOTE is the very latest in user-friendly, web-based security management. Part of the ABLOY® PROTEC CLIQ™ range, CLIQ™ REMOTE is designed for remote sites, enabling the commissioning, programming and full administration of security management centrally via web-based software.

How Does It Work?
ABLOY® CLIQ™ REMOTE integrates electronics into mechanical cylinders and keys, providing a security solution that can be managed remotely. In short, this works like an electronic handshake: when the key is inserted it engages with the cylinder, sending a random number back to the key. The key replies with an encrypted response which is decrypted by the cylinder and if valid the cylinder then allows access. It is important to remember that the mechanical combination must match as well as the digital combination. ABLOY® CLIQ™ REMOTE allows a single key to be used with multiple cabinets or trolleys.

System Features
• Secure - Provides dual security through the patented ABLOY® PROTEC mechanical disc cylinders and keys along with DES encryption, a recognised electronic standard
• Easily Programmable - Keys can be added quickly and programmed to specific time and date schedules
• Fully Auditable - Audit trails can be accessed from both the cylinder and key
• Reduces Keys - One key can be programmed to open multiple cabinets or trolleys
• Easily Accessible - The CLIQ™ environment works in a cloud hosted server farm, maintained and supported by Abloy allowing remote user access via a secure connection from anywhere in the world
• Cost Effective - Low installation & maintenance costs along with a long lifecycle (requires no wires or system updates, power for the cylinder is provided by the key)
• Easily Retrofittable - CLIQ™ cylinders are designed to fit into Euro Profile mechanical lock cases

System Benefits
• One key can be programmed to open multiple cabinets or trolleys
• The key is made personal to that member of staff, resulting in increased ownership and a reduction in the number of keys lost
• Easy to apply remote management, saves money and has the ability to cover several hospitals
• Time and date based access rights, with a full audit trail allow for full visibility of when visits were made
• New keys can be added to the system quickly and easily, removal of lost ones is hassle-free
• Reduction in time spent looking for keys

Process Flow

Start of Shift
Nurse/member of staff places their key into the Wall PD to gain validation for their shift. If key transactions are present from the previous shift they will be automatically downloaded from the key and stored in the audit trail archive (server) prior to new authorisations being uploaded*

During Shift
The key will only open cabinets where access permissions have been granted. Each time the key is used in a cabinet fitted with an ABLOY® PROTEC cylinder an audit trail is created on both the key and cylinder

End of Shift
Key is placed into the Wall PD. Previous key transactions are automatically downloaded from the key and stored in the audit trail archive (server)*

In the event that the key is not placed into the Wall PD at the end of the shift, the audit trail is downloaded the next time the key is presented to the Wall PD. In the event that a key is lost, the lock cylinder can be interrogated by a programming key (the cylinder stores an audit trail of the last 1,000 key insertions)
Questions & Answers

Q: Is the system expensive to install?
A: The system has a low installation & maintenance cost along with a long life cycle. CLIQ™ cylinders are designed to fit into Euro Profile mechanical lock cases. No wiring is required to the cabinet. The wall programming device requires an Ethernet connection and power through a 12-24V adapter or alternatively power over Ethernet.

Q: Who maintains the system?
A: System maintenance is normally assigned to a member of the hospital staff who will be responsible for programming/issuing of keys along with interrogation of audit trails.

Q: Is it possible to access the system remotely?
A: The CLIQ environment works in a cloud hosted server farm, maintained and supported by Abloy. Access from anywhere in the world is possible utilising secure encryption via the internet. Allowing users to remotely provide access rights and retrieve audits on the fly.

Q: How long do the batteries last?
A: The battery is located in the key, not the cylinder. Under normal usage a battery will operate up to 20,000 cycles or 2 years.

Q: What happens if a key is lost?
A: In the event that a key is lost this can be quickly removed from the system, if subsequently found this can be added back and re-issued. In the event that an audit trail is required for a lost key, lock cylinders can be interrogated using a programming key (each cylinder stores an audit trail of the last 1,000 key insertions).

Q: How can I better control the issuing of keys?
A: Through the use of ABLOY® KEYAXXESS (Key Safe) keys can be automatically assigned to specific users. Keys are issued using either the staff members own security card or via pin number technology.

Contact our sales team for more information.

Sales Hotline: +44 (0)1258 484455
www.bristolmaid.com

System Components

ABLOY® PROTEC CLIQ™ Key

- Provides dual security through the patented ABLOY® PROTEC mechanical disc cylinders and keys along with DES encryption, a recognised electronic standard
- Thin, light but incredibly strong key

ABLOY® PROTEC CLIQ™ Lock Barrel

- A bump proof mechanism
- Exceptionally smooth key entry and operation
- Can be master keyed and keyed alike with cylinders, cam and furniture locks as well as padlocks

Wall Programming Device

- Updates keys remotely (linking the server and users keys)
- Offers high level data encryption
- Allows the use of recurring validation, forcing users to validate their keys at the start of their shift whilst automatically downloading audit trails which are relayed to the server

KeyAxxess (Key Safe)

- Allows integration of a key safe into the CLIQ™ system to control the issuing of keys
- Keys are accessed using existing (or new) security cards or pin number technology
- Holds up to 32 un-programmed keys, each ready to be ‘handed out’ (reports on key activity are easily accessible from the system)
Controlled Drug Cabinets

Features

- Exceeds the statutory requirement for the storage of controlled drugs, “The Misuse of Drugs (Safe Custody) Regulations 1973”
- Independently security tested by Sold Secure attaining “Silver Accreditation” based on a realistic evaluation of the attack resistance of Controlled Drug Cabinets
- BS3621 anti pick and drill, key retaining six pin cylinder lock (supplied with 2 working keys and an identity card)
- Multi-point locking, operated using a handle mounted on the door (independently tested)
- Key profile unique to Hospital Metalcraft Ltd, offering 250,000 differs per profile
- Compatible with ABOLOY® CLIQ™ Remote, integrating electronics into high security mechanical disc cylinders and keys, combining electronic security and remote management in real time
- Lock protected by hardened steel plates and stainless steel escutcheon
- 3.0mm mild steel, seamless welded construction
- Mounting holes provided in back (fixings not included)
- Fixed shelf, (see table below)

Controlled Drug Cabinets

Controlled Drug Cabinets - Single Point Locking

Features

- Single-point locking
- Key profile unique to Hospital Metalcraft Ltd, offering 250,000 differs per profile
- Compatible with ABLOY® CLIQ™ Remote, integrating electronics into high security mechanical disc cylinders and keys, combining electronic security and remote management in real time
- Can be supplied with a micro-switch to allow connection to remote lighting/nurse call system by others (CD905), or supplied with a 12v DC lighting/warning system ((CD910/CD911)
- 1.5mm mild steel, seamless welded construction
- Mounting holes provided in back (fixings not included)
- Adjustable & removable shelves (refer to table for details)
- Security of models CD005, CD010 & CD015 can be enhanced by concealing inside one of our ‘Drug & Medicine Cabinets’
- Modular design allows for easy interchange with HTM 63 storage systems
- Supplied right hand hinging as standard, left hand available on request

Standard Colours

- Paint - White

Options

- CD910 - 12v DC LED Lighting/Warning System (CD005, CD010, CD015, CD020, CD025, CD040, CD055)
- CD911 - 12v DC LED Lighting/Warning System (CD030, CD035, CD045, CD050)
- Sloping tops available - Contact us for more information

CD910 & CD911 - Optional 12v DC LED Lighting/Warning System

- Door activated micro-switch
- LED warning light illuminates
  - Green when closed
  - Red when open
  - Flashes red when open for 2 ½ minutes
- Volt-free contact to allow connection to an additional light/nurse call system
