Drug & Medicine Cabinets

**Drug & Medicine Cabinets - Single Door, Standard Shelves & Door Shelves**

### Features
- Independently tested to BS2881: 1989 (Security Level One) Specification for Cupboards for the Storage of Medicines in Health Care Premises
- BS3621 anti pick and drill, key retaining five pin cylinder lock (supplied with 3 keys)
- Adjustable & removable standard shelves (190mm deep) and door shelves (75mm deep)
- Key profile unique to Hospital Metalcraft Ltd, offering 250,000 differs per profile
- Compatible with ABLOY® CLIQ™ Remote, integrating electronics into high security mechanical disc cylinders and keys, combining electronic security and remote management in real time
- 12v DC LED lighting/warning system (model dependent) with volt-free contact to allow connection to light/nurse call systems, CE marked and conforms to the low voltage directives 73/23/EEC & 89/336/EC
- Lighting transformer casing adds 105mm to overall height (model dependent)
- 0.9mm mild steel welded construction
- Mounting holes provided in back (fixings not included)
- Modular design allows for easy interchange with HTM 63 storage systems
- Compatible with our range of CD cabinets for the storage of Controlled Drugs (see table)

### Standard Colours
- Paint - White

### Options
- Digital Locking
- Sloping Top

Features
- Suitable for use with 300/500/600/800 & 1000mm wide cabinets
- Prevents items being stored on the top of the cabinet and assists cleaning
- Increases the overall height of the cabinet by 110mm
- Available factory fitted, or for fitting to existing units

Item Description Weight
PE/30 Tablet Counter 0.15kg
**What is CLIQTm Remote?**

ABLOY® CLIQTm Remote integrates electronics into mechanical cylinders and keys, providing a security solution that can be managed remotely.

**System Features**

- Secure - Provides dual security through the patented ABLOY® PROTEC mechanical disc cylinders and keys along with DES encryption, a recognised electronic standard
- Cost Effective - Low installation & maintenance costs along with a long lifecycle (requires no wires or system updates, power for the cylinder is provided by the key)
- Easy Retrofit - CLIQTm cylinders are designed to fit into Euro Profile mechanical lock cases
- Easily Programmable - Keys can be added quickly and programmed to specific time and date schedules
- Fully Auditable - Audit trails can be accessed from both the cylinder and the key
- Easily Accessible - The CLIQTm environment works in a cloud hosted server farm, maintained and supported by Abloy allowing remote user access via a secure connection from anywhere in the world

**Wall Programming Device (Wall PD)**

- Updates keys remotely (linking the server and users keys)
- High level data encryption
- Allows the use of recurring validation, forcing users to validate their keys at the start of their shift whilst automatically downloading audit trails which are relayed to the server

**KeyAxxess (Key Safe)**

- Allows integration of a key safe into the CLIQTm system to control the issuing of keys
- Keys are accessed using existing (or new) security cards or pin number technology
- Holds up to 32 un-programmed keys, each ready to be ‘handed out’ (reports on key activity are easily accessible from the system)

*1,800 events can be held within the key, following which the eldest are deleted

**Questions & Answers**

**Q** Is the system expensive to install?

**A** The system has a low installation & maintenance cost along with a long life cycle. CLIQTm cylinders are designed to fit into Euro Profile mechanical lock cases. No wiring is required to the cabinet. The wall programming device requires an Ethernet connection and power through a 12-24V adapter or alternatively power over Ethernet

**Q** Who maintains the system?

**A** System maintenance is normally assigned to a member of the hospital staff who will be responsible for programming/issuing of keys along with interrogation of audit trails

**Q** Is it possible to access the system remotely?

**A** The CLIQ environment works in a cloud hosted server farm, maintained and supported by Abloy. Access from anywhere in the world is possible utilising secure encryption via the internet. Allowing users to remotely provide access rights and retrieve audits on the fly

**Q** How long do the batteries last?

**A** The battery is located in the key, not the cylinder. Under normal usage a battery will operate up to 20,000 cycles or 2 years

**Q** What happens if a key is lost?

**A** In the event that a key is lost this can be quickly removed from the system, if subsequently found this can be added back and re-issued. In the event that an audit trail is required for a lost key, lock cylinders can be interrogated using a programming key (each cylinder stores an audit trail of the last 1,000 key insertions)

**Q** How can I better control the issuing of keys?

**A** Through the use of ABLOY® KEVAXXESS (Key Safe) keys can be automatically assigned to specific users. Keys are issued using either the staff members own security card or via pin number technology.

**Controlled Drug Cabinets - Multi-Point Locking**

**Features**

- Exceeds the statutory requirement for the storage of controlled drugs, "The Misuse of Drugs (Safe Custody) Regulations 1973"
- Independently security tested by Sold Secure attaining “Silver Accreditation” based on a realistic evaluation of the attack resistance of Controlled Drug Cabinets
- BS3621 anti pick and drill, key retaining six pin cylinder lock (supplied with 2 working keys and an identity card)
- Multi-point locking, operated using a handle mounted on the door (independently tested)
- Key profile unique to Hospital Metalcraft Ltd, offering 250,000 differs per profile
- Compatible with ABLOY® CLIQ™ Remote, integrating electronics into high security mechanical disc cylinders and keys, combining electronic security and remote management in real time
- Lock protected by hardened steel plates and stainless steel escutcheon
- 3.0mm mild steel, seamless welded construction
- Mounting holes provided in back (fixings not included)
- Fixed shelf, (refer to table for models)

Controlled Drug Cabinets - Single Point Locking

Features

- Single-point locking
- Key profile unique to Hospital Metalcraft Ltd, offering 250,000 differs per profile
- Compatible with ABLOY® CLIQ™ Remote, integrating electronics into high security mechanical disc cylinders and keys, combining electronic security and remote management in real time
- Can be supplied with a micro-switch to allow connection to remote lighting/nurse call system by others (CD905), or supplied with a 12v DC lighting/warning system (CD910)
- 1.5mm mild steel, seamless welded construction
- Mounting holes provided in back (fixings not included)
- Adjustable & removable shelves (refer to table for details)
- Security of models CD005, CD010 & CD015 can be enhanced by concealing inside one of our 'Drug & Medicine Cabinets'
- Modular design allows for easy interchange with HTM 63 storage systems
- Supplied right hand hinging as standard, left hand available on request

Standard Colours

- Paint - White

Options

- CD905 - Micro-Switch (allows connection with volt free contact)***
- CD910 - 12v DC LED Lighting/Warning System***

General Information

Dimensions & Weight

- Dimensions are stated in millimetres (width x depth x height)
- Weights are stated in kilograms
- Please ensure you are aware of the item size and weight prior to ordering

Castors

- All castors are fitted with non-marking tyres (with the exception of some anti-static versions)
- Anti-static castors can be identified by a yellow thread guard or a yellow mark on the edge of the tyre
- Castors are selected to suit the anticipated use of the trolley/piece of equipment
- Castors and wheel bearings do not require specific maintenance other than regular cleaning. The use of oil will breakdown the grease applied to the bearings, reducing the life of the castor. We recommend that fittings are checked regularly and re-tightened as required
- Where anti-static castors are fitted, we recommend that the tyre is periodically cleaned to remove any dirt to ensure a good contact between the tyre and the floor

Locks & Keys

- Locks should operate smoothly. If they do not, please arrange urgent attention and where necessary obtain a replacement
- Locks require only minimal maintenance and should only be lubricated using a dry lubricant such as graphite which can be purchased from most locksmiths (NEVER USE OIL)
- When ordering replacement locks or keys, please ensure that the product code, and any letters/numbers from the key and lock are available

Paint

- We only use lead-free epoxy/polyester powder paint
- Where possible colours are applied in special booths to allow for overspray to be recycled
- Alterative colours are available, this may be incur a small surcharge

Stainless Steel

- We use 304 and 430 grade stainless steel
- Grade 304 is non-magnetic and used on products which are not painted
- Grade 430 is magnetic and used on painted products
- Other grades are available on request, i.e. 316
- Please note that the term ‘stainless’ is not entirely accurate, as certain chemicals can ‘eat’ into the surface. In particular ‘iodine’ which can badly corrode/stain and as a result should not be used as a cleaning agent

Laminate & Wood Products

- Wood products are manufactured from FSC accredited materials
  - Flame retardant ‘High Pressure Laminate’ bonded to MDF
  - Melamine faced MDF
- Edges are protected with 2mm ABS/T-Barb edging or sealed with varnish
- Both laminate and melamine panels offer some resistance to water penetration under normal usage
- We only use water based adhesives and varnishes

Upholstery

- Upholstered panels are manufactured from ‘Flame Retardant’ materials, independently tested to ‘BS5852 Ignition Source 5’ (BS7176 Medium Hazard)
- Vinyl’s offer resistance to:
  - Melsept SF - Code CH - B:4422M32 (0.5% / 5%)
  - Hexaquart S - Code CH - B:406432 (1.5% / 5%)
  - Melseptol - Code CH - B:4273M92 (Undiluted)
- All foam is ‘Fire Retardant’ and free of ‘Hexa-Bromo-Cyclo-Dodecane’

Latex

- All products are latex free
The maintenance of high standards of cleanliness on all surfaces and equipment is a crucial factor in the prevention and control of infection. Whilst dust, dirt and moisture can harbour infection, the key risks are associated with contamination arising from contact with blood, body fluids, mucous membranes and damaged skin. In all cases surfaces must be thoroughly cleaned and disinfected in order to destroy pathogenic micro organisms.

Bristol Maid™ products have been designed for use in demanding environments; full cleaning instructions can be downloaded from www.bristolmaid.com

WEEE Regulations

Hospital Metalcraft meets its obligations as a business to business producer of Electrical and Electronic Equipment (EEE) through:

- Membership of the Veolia Environmental Services WEEE, (Waste Electrical and Electronic Equipment), Producer Compliance Scheme (Registration No. WEE/KE0677RX)
- Marking EEE placed on the market by Hospital Metalcraft with the mandatory crossed out wheeled bin symbol and Bristol Maid logo
- Making information available, (for EEE placed on the market after April 2007), to assist those engaged in treatment, recovery and recycling activities
- Arranging for the collection, treatment, recovery and environmentally sound disposal of obligated WEEE

Customers are advised that infected medical devices are not included within the scope of the WEEE Regulations and that arrangements described above do not extend to such products

How To Order

- All orders are required in writing, either by fax, email or post. Unfortunately we cannot accept orders over the phone.
- Orders should be submitted as an ‘official purchase order’ on company headed paper. All information should be clearly displayed.
- Your order should contain the following - invoice address, delivery address, full contact details (name, phone & fax number) item codes along with descriptions and prices.
- If applicable, please ensure our quote number is detailed on your order to ensure any agreed discounts are applied.
- Item codes and descriptions in this catalogue supersede all previous editions.
- A full price list can be requested from our website.
- Payments can be made by cheque, bank transfer or credit/debit card (with the exception of American Express).
- If you are a new customer, the first three orders will be processed on a proforma basis, paid in full prior to manufacture & delivery, after which a credit account may be applied for.
- For our terms and conditions refer to www.bristolmaid.com.
- For further information and assistance, please contact our customer services team on +44 (0) 1258 484455.

Based in Blandford Forum, Dorset we design, manufacture and distribute the extensive range of Bristol Maid™ medical furniture together with other complimentary products from selected partners. With a broad portfolio and a comprehensive support team we are proud to provide a responsive and flexible service to meet our customer’s needs.

With over 58 years experience, the Bristol Maid™ brand has become synonymous with quality, durability and reliability, with a wide range of customers including the NHS, Private Healthcare Sector, Pharmacies and a growing network of Distributors throughout the UK, Ireland and many other countries around the world.

Working with our customers we are continually developing and enhancing our product ranges to ensure that they are fit for purpose, easy to use, reliable and above all represent value for money. We hope that you find this catalogue useful and welcome your suggestions on any improvements.
